ABOUT ME

AI graduate from Asia Pacific University (APU) with hands-on experience in IT infrastructure support and AI-driven system development. Completed internship at Zalora supporting enterprise IT systems, user access management, and database connectivity. Developed a game-based learning platform to teach neural network fundamentals using Godot.

EXPERIENCE

IT Infrastructure Support Intern Zalora

- Managed and resolved IT service tickets by diagnosing technical issues and providing system troubleshooting for internal users.
- Utilised enterprise tools such as **JIRA, SAP, Confluence, Freshservice, and Kaseya** to track incidents and maintain service documentation.
- Collaborated with IT team members to ensure timely resolution of infrastructure and user support requests.

Educational Neural Network Game (Final Year Project)

- Developed a solo project using the **Godot engine** to create an RPG-style educational game designed to teach the fundamentals of neural networks.
- Integrated quiz-based learning mechanics with horde-survival gameplay to **reinforce basic AI concepts interactively**.
- leveraged **Google Gemini** throughout the development process to **prototype game logic, debug GDScript**, and ensure the technical accuracy of the educational content.
- Conducted evaluation sessions with students to assess learning effectiveness and collect user feedback.

AI & Software Development Projects

- Built a **Spotify popularity prediction model** using data analysis and machine learning techniques.
- Developed a **car plate detection system** using image processing techniques in MATLAB.
- Created a **flight delay prediction model** using RapidMiner for predictive analytics.
- Designed and implemented an **AI chatbot** using Botpress, integrated into an HTML-based webpage.

Ideathon Participant

- Collaborated in a team to develop a prototype concept focused on Web3 Solana trading.
- Presented the project idea and explored concepts related to cryptocurrency and decentralized trading platforms.

RoboRoarZ Robotics Workshop Participant

- Hosted by Singapore University of Technology and Design
- Participated in a hands-on workshop introducing the Smoorph robotics platform and its applications.
